Automation Plan under Section 9 of P. L. 96-517 Sent to Congress

On Dec. 1, 1982, the Patent and Trademark Office delivered to the Congress a comprehensive plan for automating the Patent and Trademark Office by 1990. The plan which took two years to develop is required by §9 P.L. 96-517.

The plan details a three phase program. During the first phase, which extends through calendar year 1984, all trademark functions and patent Group 220 will be fully automated. In the second phase, which runs through 1987, all patent groups will be fully automated and an essentially paperless operation achieved. The third and final stage will provide world wide access and expanded dissemination capabilities.

The plan consists of three volumes: a 27 page executive summary (Vol. 1), a detail Automation Master Plan (Vol. 2) and appendices (Vol. 3). A copy of the executive summary will be sent to any interested member of the public. Requests should be directed to Dr. J. Howard Bryant, Administrator for Automation, (703-557-3967). A limited number of copies of the Master Plan and the Appendices are also available.
